2. Introduction

The following requests are supported in version 2.0 of the LTA OTA Interface:

- LTA_PingRQ
 - Monitoring / Ping Request
- LTA_InsurancePlanSearchRQ
 - Get insurance with or without quote (AutoQuote false / true)
- LTA_InsuranceQuoteRQ
 - Get insurance quote
- LTA_InsuranceBookRQ
 - Book an insurance for a given Quote-ID (Quote-ID returned in LTA_InsurancePlanSearch or LTA_InsuranceQuote)
 - Book an insurance for a PlanCode / Tariff Code
- LTA_InsuranceSearchRQ
 - List booked insurance for a customer
 - Show insurance details for a booking
- LTA_InsuranceSearchRQ
 - List booked insurance for a customer
- LTA_CancelRQ
 - Supported in API but not yet supported by LTA. Returns error message

A WSDL can be requested at <https://remote.vdv-gmbh.de:8443/webservices/test/wSDL>

Production access can be granted on request.

3. Common Elements

3.1 Main attributes

Each request contains the following attributes:

- MsgId
 - Unique message identifier
- EchoToken
 - A reference for additional message identification, assigned by the requesting host system.
- TransactionContext
 - A unique identifier to relate all messages within a transaction (e.g. this would be sent in all request and response messages that are part of an on-going transaction)
- TimeStamp
 - Indicates the creation date and time of the message in UTC using the following format specified by ISO 8601; YYYY-MM-DDThh:mm:ssZ with time values using the 24 hour clock (e.g. 20 November 2003, 1:59:38 pm UTC becomes 2003-11-20T13:59:38Z).
- Target
 - Used to indicate whether the request is a Test (T) or Production (P) request.
 - Please use Test during implementation and testing processes

3.2 Requestor

For the authorization the 9 digits CRS terminal number (agency-id and business-unit) is used together with a CRS channel code:

```
<ota:Requestor>
  <com:CRS>AMA</com:CRS>
  <com:CRSAgency>123456</com:CRSAgency>
  <com:BusinessUnit>001</com:BusinessUnit>
  <com:Initiator>broker</com:Initiator>
  <com:Agent>jh</com:Agent>
  <com:Localisation>
    <com:Country>DE</com:Country>
    <com:Language>DE</com:Language>
    <com:Currency>EUR</com:Currency>
  </com:Localisation>
</ota:Requestor>
```

In the example the value AMA 123456/001 is used for CRS Agency/Business-Unit. These values must be replaced by the values that are provided by LTA.

The following enumerations are valid:

- CRS:
 - Amadeus: AMA
 - Sabre: SAB
 - Bewotec: BEW
 - Schmetterling: SME
 - Traffics: TFX
- Initiator:
 - broker
 - customer
- Country / Language / Currency:
 - Country: DE and AT
 - Language ISO 639, valid for version 2.0: DE
 - Currency: ISO 421, valid for version 2.0: EUR

The requestor element must be used in every request except LTA_PingRQ.

3.3 Covered Trip

With every request the element CoveredTrip must be set:

- StartDate: Start Date of Trip
- EndDate: End Date of Trip
- Destination: Destination Country – not mandatory!
- TravelType: Not mandatory!
- TotalTripCost: Costs of trip. Mandatory for BASIC and All-In-One / Flexible Insurances
- BookingConfirmation: Date of Booking Confirmation for trip

The OTA API returns all single trip insurances (Basic, Basic-Travel) and all annual insurances (All-In-One, Flexibel) for PlanSearch Requests.

If the trip takes place in less than 30 days, the insurance can only be booked if the booking date of the trip is the same as the booking date of the insurance. This means, the insurance can only be booked at the day of travel booking.

4. Workflow

LTA_InsurancePlanSearch with AutoQuote = false delivers a list of possible insurance offers for the given request data.

When using LTA_InsurancePlanSearch with AutoQuote = true, the response contains all possible insurance offers with generated quotes, identified by the QuoteID. The quote is valid for 30 minutes after it has been created.

LTA_InsuranceQuote request can be used to retrieve a single Quote for a given TariffCode, as returned in LTA_InsurancePlanSearch.

The easiest way to create a booking is using the

- LTA_InsurancePlanSearch with AutoQuote and
- LTA_InsuranceBook with the QuoteID as reference.

As a second option, the PlanCode or TariffCode (e.g. "ALL-IN-ONE_FAMILY-070-10000_SCC") can be used to reference the insurance product that should be booked.

5. Examples

5.1 LTA_PingRQ

Request:
